

- Mounts directly in the lighting controller
- No external power required
- Supports 10/100Base-T Ethernet
- IP address is configurable
- Can be factory pre-configured via embedded web page
- Enables communications on a LAN or WAN
- Only one module required per network of panels

### Overview

The TCP/IP module gives the ILC Apprentice II lighting controller the ability to have an IP address on a 10/100Base-T Ethernet network. With this feature you can connect to the panels, monitor, and program and using the Apprentice II Pro software. With this module you can connect from anywhere on the local area network or from the wide area network. The module is IP address configurable through an internal web page using a common web browser to meet the facilities requirements. Only 1 module is required per network of panels and installs in minutes.

### Features

#### General Information

- Mounts directly in the lighting controller
- Ribbon cable interface attached

#### Communication Characteristics

- Ethernet 2.0/IEEE 802.3
- Speed 10/100Base-T

### Physical

### Specifications

#### Physical:

- 4"W x 4.25"H x .87"D
- Plug-in module designed for mounting directly in master panel

#### Electrical:

- Powered from panel controller

#### Ethernet Communication:

- Compatibility Ethernet 2.0/IEEE 802.3
- Speed 10/100Base-T
- Connector RJ45(1)

#### Operating Environment:

- Location Interior space
- Operating Temperature 0° to 60° C (32° to 112° F)
- Relative Humidity 10% to 90% Non-condensing
- Atmosphere Non-explosive, Non-corrosive
- Vibration Stationary application NEMA Level A

#### Certifications:

- UL
- FCC approval for commercial use
- CE
