

LIGHT *Master* DMXG

USITT DMX 512 Gateway

- Provides single point control interface between systems using DMX 512 control protocol and ILC's LightMaster network
- Uses USITT standard DMX control signals
- Connects directly to the DMX 512 RS485 bus of any DMX controller
- Adjustable ON and OFF set points
- Supports full 512 channels of DMX
- Cost-effective alternative to non-dims
- Adjustable DMX frame filter
- Adjustable Lock ON/Lock OFF feature
- Used in LightMaster Standard or Extended Networks
- RJ45 connectors for LightMaster data line cable
- Custom configurations available

Overview

The LightMaster DMX Gateway can easily be added to any LightMaster programmable lighting control panel network to provide for direct control of ON/OFF lighting or other loads from any DMX control device. Any of the available 512 DMX control channels may be mapped to control individual relays.

Features

Programming

- The DMX 512 Gateway control functions can be programmed and reviewed directly from the lighting panel's keypad
- DMX control functions can also be performed from a PC through the use of LightMaster Pro DMX Gateway configuration software for Windows

DMX 512 Control

- Adjustable ON and OFF set points
- Each relay may be locked ON/OFF based on DMX levels
- Map any relay to any DMX control channel
- Adjustable DMX frame filter
