## Corridor/Stairwell-EVO Pre-Program: F9

Corridor/Stairwell, 1 or 2-Zone, Occupancy High/Low Dim, 1 Daylight Zone
Photo sensor inputs for 1 daylight zone(PC-1), Motion sensor inputs for Occupancy On-High/Off or Dim level control with Building Open/Closed change of sequence
Remote digital CAT-5 LightSync G3 control On-Off(Open)/Timed On-2Hr (Closed) Key switch or 1-Button switch's, and Optional hardwired key switch input (OSC: 03.4)

Alternate/Adder (F9) start at 13 and use a LSOSI module for 800mA power - supporting 1 Corridor or Stairwell using Relay 3 \& 4 for 2 relay power circuits as 1-zone. Photo sensor inputs for 1 daylight zone (PC-2), motion sensor inputs for Occupancy on/off control or Occupancy On + dimming ON (High/Low)
Remote digital CAT-5 LightSync (14-19 6-addresses) for local control On-Off/Timed On-2Hr. (Closed) Key switch or 1-Button switches, and Optional key switch (OSC: 13.4)

* This panel requires the Occupancy sensor to be wired to Inputs 1\&2 for Day/Night operation

The $\mathbf{2}$ Inputs become Enabled/Disabled by the Open/Close timer 7 Days a week

| $\begin{array}{c}\text { Open/Closer - Time setting } \\ \text { Days }\end{array}$ |  | Open |
| :---: | :---: | :---: |$]$ Close $\quad$.

Input 1 operates the load $1 \& 2$ for Occupied ON at 100\%, and Unoccupied to $\mathbf{5 0 \%}$
Input 2 operates the load 1\&2 for Occupied ON at 100\%, and Unoccupied Off
Input 3 is used for a Maintained Key True-Override switch and will Force the relays $1 \& 2 \mathrm{ON}$ at $100 \%$
This input is a "Conditional Relay ON" and disables the panels other inputs for the $\mathbf{2}$ loads until the Mnt. Input $\mathbf{3}$ is released Input 4 and the 6 LightSync digital switch addresses are used for a Momentary key, PB or Toggle switch's as a local On station
There type "A" operation is On at $100 \%$ during the Open or Day cycle as a momentary action
There type "B" operation is On at $100 \%$ for 2 Hours ( 120 Min ) during the Closed or Night cycle
These operations are the same for Relay/Dimmer outputs 3\&4 using a remote LSOS8I at LS:13 and up to 6 LS Digital switches at LS:14-19
This EVO Panel must have an Internal Clock (EVO-TC) for timer operation or be networked
If No clock is present the panel will remain at 12:00 Midnight in the Closed "B" operation
Refer to Code Drawings CD0003, 0004 (Title 24) CD0203,0204 (ASHRAE) CD0403, 0404(IECC)
