

LightSync Wireless EnOcean Input Module Installation Details

Install LS-WEIM using the provided 4-11/16" junction box. Connect to ILC LightLEEDer network using CAT-5 data cable. Mount device so that antenna protrudes downward unobstructed. Keep clear from other 902MHz equipment, preferred location would be where the antenna extends down into open air below the ceiling tile, allowing a 100' radius for EnOcean switch stations and occupancy sensors devices.
