O intelligent

Light**LEED**er

InSite-LL

Overview

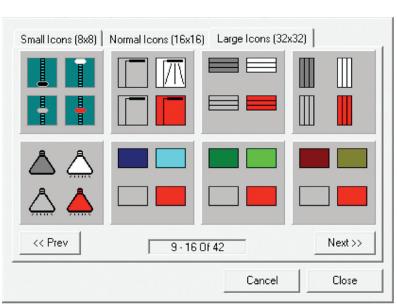

LightLEEDer InSite software provides a Windows-based graphical interface that allows monitoring and control of LightLEEDer panels using icons on custom or standard graphical screens. With a simple click of the mouse, or a push on a touchscreen you can control relays, groups, presets, scenes, dimming outputs, or navigate between screens. Screens are simple bitmap pictures that can depict your facility's floorplan layout or simple color backgrounds. Select from a library of load icons for direct status and control; or select control and navigation buttons with options for customizing. InSite provides extensive timer scheduling and sequencing options. It also supports multiple interfaces, and is equipped with user/password protection that contains 5 levels of user access. InSite Software allows control of 1 to 16 LightLEEDer panel networks, works seamlessly with LightLEEDer Pro panel software, and maintains full time connectivity monitoring with e-mail notification.

Specifications

Programming Capabilities:

• Graphic screens can consist of any bitmap picture in virtually limitless numbers

InSite Schedules

- Control icons are unlimited per screen and can be chosen from an extensive library
- · Icons can be edited at any time to include or exclude relays

Graphical Control and Status:

- Simply point and click on an icon to control relays, groups, presets, scene or dimmers
- Control 0-10V devices from a slider or icon
- Control DMX512 devices directly from the screen
- Control louvers with a click of an icon
- View real-time status of relays, groups, scenes, or presets

Scheduling and Sequencing:

- Extensive calendar-based scheduling for up to 4000 programmable schedules to automatically control relays, groups, scenes, presets or trigger a sequence
- Sequences with up to 16 transitions over a 12-hour period can be used to turn on/off single relays, groups, set a preset or scene

Suggested Minimum System Requirements:

- Windows 10 Pro 64 bit
- i5 Quad-Core 2.4GHz
- 16GB ram
- •TCP/IP 10/100 Ethernet port
- Universal Serial port

Connection Options:

- USB 2.0
- TCP/IP 10/100
