

LightLEEDer

NEMA 4X Air Conditioned Enclosure

Overview

The LightLEEDer NEMA 4X Air Conditioned Enclosure is an option that can provide a secure and climate controlled environment for your LightLEEDer controller. This enclosure can be placed outdoors, is thoroughly insulated, and equipped with a climate control air conditioning unit. It is provided with a closed-loop cooling system, programmable thermostat, and a stainless steel corrosion resistant shell that make this enclosure an excellent option for storm protection. This enclosure has a capacity of up to a 48 relay controller, 4 Line Voltage Dimmers(LVD), or a 24 relay controller and 2 LVDs

Features

- **Made in the USA**
- **NEMA 4X** rated for corrosive environments.
- **Built in Condensate Evaporator.**
- **Heavy-duty Stainless-Steel Shell** with internal corrosion protection.
- **Programmable Thermostat** allows remote temperature monitoring and control.
- **Closed-loop Cooling** enables steady temperature control while eliminating humidity and dust.
- **Factory mounted LightLEEDer Controller.**
- **CFC-Free Refrigerant.**

NEMA 4X Air Conditioned Enclosure

Physical

NEMA 4X Air Conditioned Enclosure

Specifications

Physical:

- 43.00" W x 36.00" H x 12.00" D
- Stainless Steel
- Corrosion Resistant
- NEMA 4X Rated

Electrical:

- 4.3 A @ 120 V to Air Conditioning Unit

Capacities:

- Up to a 48 relay controller
- 4 Line Voltage Dimmers(LVD)
- 24 relay controller and 2 LVDs

Operating Environment:

- Location: Exterior Space
- Operating Temp.: 0° to 62° C
- Humidity: 100%
- Atmosphere: Non-explosive/corrosive
- Vibration: Stationary

Certifications and Approvals:

- UL CUL
