LightSync Digital

Data Line Key Switch

Overview

The LightSync Digital data line key switch provides an extra level of security and limits access to only those who possess the key. Switch stations have a high quality 5-tumbler key switch and status LED. Key switches may be programmed to control any relay(s), group(s) or preset(s) throughout the network. Switch faceplates are available in four colors, stainless steel, and brushed aluminum and are supplied with matching Decora® switch plates.

Standard cover
