

LightSync Isolated Dimming Module Details

Caution: Always verify 10VDC on control wires before connecting to the terminal. Line voltage applied will cause damage to electronics and possible electrocution

0-10VDC dimming terminations

Removable screw type terminal blocks that accepts 16-12 AWG wire

- 0-10VDC dimming output control device with 4 independent channels
- Sink up to 100mA per channel (200 ballasts at .5mA each)
- Consult ballast manufacturer for maximum distance to ballast

16 AWG	800 feet
18 AWG	500 feet
20 AWG	320 feet
22 AWG	200 feet
24 AWG	120 feet
