

Overview

The LightLEEDer EVO is a distributed lighting controller that simplifies installation. The LLEVO comes pre-programmed for 16 common lighting applications that can be selected by turning a dial. The LLEVO can operate as stand-alone or networked, reverting to stand-alone automatically if the network is interrupted. Easily connect up to 4 R20D relays, via CAT-5 or -6 cable, the R20D relay can control lighting loads with 0-10V dimming or receptacles. Programming can be easily modified using the ILC Pro Bluetooth app or LightLEEDer Pro software. The LLEVO can be expanded up to 20 zones by adding an LSEVO-RC, LSEVO-INT-2-RC, LSEVO-4X/8X or LSLVD.
